Description

As a user of the [Kayak.com](#) website, I want to see the homepage where I should be able to navigate to various website sections and search for flights.

The Homepage of [Kayak.com](#) will consist of four different sections:

Side Menu containing the following links:

- Sign In – The link to the user account,
- Flights – The actual homepage,
- Stays – Link to the hotel <http://hotels.com> page,
- Car Rental – Link to the car rental feature,
- Things to do – Link to various articles regarding what to do on city tours,
- Packages – Aggregate option to find hotels, flights, and things to do,
- Train and buses – The booking module for trains and buses,
- Explore – Link to visual exploration of the current offers,
- Travel Restrictions – Link to a page with information about the current governmental restrictions,
- Trips – Link for planning trips page

The user should be able to collapse the side menu (this will replace the text with icons).

The current page should be highlighted on the menu.

The menu should keep its position when the page is scrolled.

The top menu will contain the following information/links:

- Kayak logo on the left with a link to the homepage
- Trips link – the same from the main menu
- Business - Link for the business travel plan page
- Favorites - Save trip details regarding flights, hotels and more

- Sign in to your account link

If the user is logged In, Sign In Button will be replaced by the User Menu.

The menu should remain sticky if the page is scrolled.

The main Content section will contain:

- Flights Search Widget (**relates to** <https://denisabaicu89.atlassian.net/browse/KYK-2?atlOrigin=eyJpIjoiOWU1ZjJiZTA4ODJkNGRmYjgxODVkODJkNDA3ZGE1NzEiLCJwIjoiAJ9>)
